Personal Profile

I'm a Full-Stack developer with experience in the JavaScript ecosystem. I have created amazing projects ranging from creating robust RESTful APIs to developing front-end applications that consume them. With a passion for continuous learning, I am currently immersing myself into the world of C#. I thrive in agile environments and excel at collaborating with cross-functional teams to deliver high-quality solutions.

Skills

Back-end: Node, Express, PostgreSQL, REST API development, Experience with MVC design pattern

Front-end: React, HTML, CSS, Bootstrap, JavaScript

Tools and Technologies: Jest, Git, GitHub, TypeScript

Work History

11/2022 – 03/2023 **Northcoders - Trainee Full-Stack Developer**

During the program, I immersed myself in the world of back-end and front-end development and learned how to create full-stack applications from scratch to deployment, using Agile methodologies.

- Developed a mobile application called **Swapz** as part of a team project using React Native and Expo Go. The app enables users to exchange goods and features a simple and intuitive user interface. Utilized Firebase as Backend-as-a-service for data storage, and image hosting. [Video Presentation-Link](#)
- Designed the **NC-Games** API with a RESTful architecture, enabling users to view, create, update and delete reviews and comments. Ensured easy integration with client-side applications and scalability for future expansion. [NC-Games-Link](#)
- Developed a front-end **Genre Gaming Opinion Hub** that connects to my back-end API to fetch data containing images of games with different categories. Users can view game reviews, leave comments, and interact with reviews. [GGOH-Link](#)

2023 – Current **Amazon – Team Leader (Step-Up)**

- Collaborate with other departments or stakeholders to resolve issues and streamline processes for improved cross-functional operations.
- Conduct regular team meetings to provide updates, address concerns, and encourage a culture of continuous improvement.
- Monitor team performance, track metrics, and implement strategies to improve productivity, quality, and efficiency.

05/2020 – 12/2022 **Amazon – Amnesty Responder**

- Collaborated with team members and supervisors to report and document drive issues, providing accurate and detailed information for maintenance records and future reference
- Conducted inspections and maintenance, promptly resolving faults for optimal functionality.

- Used a software application to monitor drive performance and assess the overall condition of the floor, proactively identifying potential risks or disruptions to the operations flow.

07/2019 – 05/2020 Amazon - Warehouse Operations Associate

- Conducted research to address shipping errors and packaging mistakes
- Ensured that the picked product conforms to the order sheet provided
- Adhered to strict safety, quality and production standards

Education

03/2022 – 08/2022 Pitman Training Centre - Web Developer Diploma

- Computer and Technology Basics for Developers
- JavaScript fundamentals
- HTML
- CSS/SCSS

09/2021 CompTIA A+220-1001 Core 1

- Good understanding of cloud computing concepts, including SaaS, IaaS and PaaS models
- Familiarity with network architecture, protocols and devices, as well as network troubleshooting and security
- Experience in the installation, configuration and troubleshooting of various operating systems, such as Windows, macOS, Linux and mobile operating systems.

2008 – 2013 Don Luigi Sturzo, Bagheria, Italy

A Levels (Equivalent) including Accounting, Maths, and Science

Interest and Hobbies

- **Regular exercise:** Jogging is a significant part of my fitness routine, and it plays a vital role in contributing to my overall mental wellness. It allow me to clear my mind, recharge and find inspiration.
- **Staying up to date with technology trends:** I actively stay informed about the latest trends and advancements in the software development field.
- **Building personal projects:** Undertaking projects using Agile methodologies, TDD, and efficient code management.

Projects

- **Mealtime:** A RESTful API designed for seamless API interaction and website development. Developed using Node, Express, and PostgreSQL. [Project-Link](#)
- **TastyCards** (Work in Progress): A TypeScript React project that seamlessly connects to my backend API, allowing users to explore a catalog of recipes and generate random ones. With its user-friendly interface built on Bootstrap, users can interact with the app by leaving likes and comments on their favourite recipes. [Project-Link](#)
